

Release Notes

TTim

V 2.0.0_Alpha

Date: Aug 2024

Document Version 1.0.0

1. Introduction

This document provides details about the release of version 2.0.0 of the TTim. It includes information on new features, bug fixes, and known issues.

2. Supported OS

OS: Windows 10 & 11

RAM: 8GB or more

Processor: Intel i5/i7/i9

Available space: 1GB or more

OS: Mac

Chip: M1 & M2

Version: Above 14.0

3. New Features

Feature1: New graphical user Interface, which avoids browser restrictions.

Feature 2: When logging in, users can select their organization, allowing them to sync their activities to the appropriate organization account and ensure accurate mapping of their project contributions.

Feature 3: Users can now see which company their activity data is linked to directly in their profile. This also ensures accurate mapping of their project contributions to the correct organization.

4. Known Issue

When users open their profile by clicking on the side menu, the information box can only be closed by clicking on the user profile menu again. It cannot be closed by clicking anywhere else.

5. Bug Fixes

The lagging issue has been addressed. The previous version caused user experience lags during typing and running other applications. This has now been completely resolved.

6. Upgrade Instructions

Simply Download the application, Open setup file the system will ask whether to install for one user or all the users of the system, choose anyone of them and follow the screen, once successfully installation the shortcut Icon will be available on the home page , if not chosen to make desktop shortcut search the application and open, sign up as new user and start capturing the activities on the installed system.
